ATLANTA, GA., SEPTEMBER 27, 1886.

Indications for Atlanta and Georgia, taken at 1 o'clock, a.m.

Barometer, Fair weather, stationary.

Wind, variable, Virginia: Local.

Winds, followed by fair weather, slightly cooler, westerly winds.

North Carolina and South Carolina: Fair weather, nearly stationary temperature, winds generally southerly.

Georgia: Fair weather, stationary temperature, winds generally southerly.

Eastern Florida: Fair weather, stationary temperature, westerly winds shifting to southerly.

Western Florida and Alabama: Fair weather, slightly cooler, southerly winds.

Mississippi: Generally fair weather, variable.

Tennessee: Local rains followed by fair weather, southerly winds shifting to westerly.

Behind the Times.

The Macon Telegraph now displays a commendable solicitude concerning the welfare of the Macon and Covington railroad.

It is rather late in the day, but better late than never.

It will be recalled that THE CONSTITUTION stood by the enterprise from the first.

At a time when a good word was calculated to help it, we spoke out for it in no uncertain way. This has not been forgotten.

The Paralysis of Society.

The report that one of the sons of the prince of Wales is to marry Miss Jennie Chamberlain, the American beauty, has stirred up the wrath of London society.

The complaint is made that despite every precaution Americans will get into English society.

It is very unpleasant for the descendants of the red-headed Norman robbers to mingle with plain people whose ancestors laid the foundation of their fortunes by hard work, but there seems to be no help for it.

What makes the matter worse is the fact that the culture, refinement and good looks of the Americans cannot be disputed.

In this country we have a small and very select circle of society that will sympathize with the grievance of their British cousins.

It has been found here, as on the other side of the water, that society is all the time being recruited by persons who have no pedigree to boast of, and perhaps no pedigree at all.

These interlopers, as a rule, possess brains, education and personal attractions. In conversation they walk into society.

They charge of it and run it, while old Spytenduyvel Knickerbocker finds himself gently crowded to the outer edge.

It is astonishing how such things can be, but as we said before, there is no remedy.

Society has been revolutionized, new ideas are at work, and new blood is coming to the front.

A son of the prince of Wales could not do better than to marry a good and pretty American girl, but such a girl could find a much better husband here at home.

Some of our girls have married princes, and they lived to regret it. Miss Patterson married a Bonaparte, and she deserted her.

Miss Willis married a Murat, who was also a Bonaparte, and he annoyed her by going to bed with his boots on.

We do not wish to see how the inner circle of society either in England or in America can keep the plebeians out, especially when the new comers are in every way superior to those who are trying to put them down.

However, there is nothing in all this to excite alarm. The doctrine of the survival of the fittest applies to all social problems.

Society will regulate itself, and its revolutions are only steps in its forward march.

A Moral Monster.

A horrible story comes to us from London. The Rev. Edward Steele is the pastor of an Islington church, and on Sundays he preaches in the open air in Hyde Park.

He is noted for his fervor and eloquence.

A few Sundays ago Steele preached a powerful sermon which affected him so much that the tears ran down his cheeks.

When he left the church he went home and beat his two little boys with a knotted rope until their bodies and faces were raw and bloody.

The punishment was inflicted because the boys, who had been out all day, had failed to sell a certain number of religious tracts entitled "No Eternal Torment" and "The Restoration of Apostolic Christianity."

Some of our girls have married princes, and they lived to regret it. Miss Patterson married a Bonaparte, and she deserted her.

Miss Willis married a Murat, who was also a Bonaparte, and he annoyed her by going to bed with his boots on.

We do not wish to see how the inner circle of society either in England or in America can keep the plebeians out, especially when the new comers are in every way superior to those who are trying to put them down.

However, there is nothing in all this to excite alarm. The doctrine of the survival of the fittest applies to all social problems.

Society will regulate itself, and its revolutions are only steps in its forward march.

A Moral Monster.

A horrible story comes to us from London. The Rev. Edward Steele is the pastor of an Islington church, and on Sundays he preaches in the open air in Hyde Park.

He is noted for his fervor and eloquence.

A few Sundays ago Steele preached a powerful sermon which affected him so much that the tears ran down his cheeks.

When he left the church he went home and beat his two little boys with a knotted rope until their bodies and faces were raw and bloody.

The punishment was inflicted because the boys, who had been out all day, had failed to sell a certain number of religious tracts entitled "No Eternal Torment" and "The Restoration of Apostolic Christianity."

Behind the Times.

The Macon Telegraph now displays a commendable solicitude concerning the welfare of the Macon and Covington railroad.

It is rather late in the day, but better late than never.

It will be recalled that THE CONSTITUTION stood by the enterprise from the first.

At a time when a good word was calculated to help it, we spoke out for it in no uncertain way. This has not been forgotten.

The Paralysis of Society.

The report that one of the sons of the prince of Wales is to marry Miss Jennie Chamberlain, the American beauty, has stirred up the wrath of London society.

The complaint is made that despite every precaution Americans will get into English society.

It is very unpleasant for the descendants of the red-headed Norman robbers to mingle with plain people whose ancestors laid the foundation of their fortunes by hard work, but there seems to be no help for it.

What makes the matter worse is the fact that the culture, refinement and good looks of the Americans cannot be disputed.

In this country we have a small and very select circle of society that will sympathize with the grievance of their British cousins.

It has been found here, as on the other side of the water, that society is all the time being recruited by persons who have no pedigree to boast of, and perhaps no pedigree at all.

These interlopers, as a rule, possess brains, education and personal attractions. In conversation they walk into society.

They charge of it and run it, while old Spytenduyvel Knickerbocker finds himself gently crowded to the outer edge.

It is astonishing how such things can be, but as we said before, there is no remedy.

Society has been revolutionized, new ideas are at work, and new blood is coming to the front.

A son of the prince of Wales could not do better than to marry a good and pretty American girl, but such a girl could find a much better husband here at home.

THE BIGGEST, GREATEST AND IN ALL THINGS THE BEST SHOW THAT EVER EXHIBITED IN THIS STATE.

Atlanta, Wednesday, Oct. 27.

JOHN B. DORIS'S GREAT INTER-OCEAN CIRCUS!

Menagerie, Museum, Great Racing Carnival and World's Exposition of Novelties, the One and Only Show Which Exhibits in the Southern Cities.

The same performers, precisely the same huge tents, precisely the same mammoth railroad and lot equipment which it did in the north, added to immensity and short of nothing it will exhibit precisely as it did this summer in the great New England states, in Boston, New York, Philadelphia, and other metropolitan cities.

The Most Perfect, the Greatest, the Grandest Show the World has ever seen. 300 Bright Arenic Stars complete the Circus Confederation. A Mint of money invested in Miles and Mammoth, make up the Menagerie.

A World-Gleaned Institution, supported by Brains, Capital, Enterprise and Energy.

THE SHOW FOR WHICH COURTS ADJOURN.

Factories shut down, schools are dismissed and the first families form fashionable circus parties. A show exclusive in all its novelties requiring a CITY OF SNOW WHITE CANVAS to hold its multifarious marvels, sharing equal patronage with THE GREAT SOUTHERN EXPOSITION.

JUST ADDED 8 OF THE LARGEST, GREATEST AND GRANDDEST ELEPHANTS IN CAPTIVITY.

Frozen Monster of the North; Chief; Empress; Queen.

WAIT FOR IT. THE WISE WILL WAIT. IT IS THE Triumphant Towering Monarch of the Tented World

Forty-five minutes ride from Atlanta on the Western and Atlantic Railroad with six trains each way daily. The beautiful site called

THE WOUNDED BURGLAR

RULEFORD, THE NEGRO WHO WAS SHOT, IS STILL ALIVE.

The Wounds Carefully Examined and Dressed by Dr. Van Goldenovon. How Seriously the Wounds Prove to Be—The Situation in the House When the Burglar Entered, Etc.

John Ruleford, the burglar, who was shot in Mr. Sindall's residence yesterday morning, is still alive, but the probability of his recovery is not so certain as it was when he was first shot.

His recovery, however, is considered impossible.

When Patrolmen Phillips and Brennan reached police headquarters with Ruleford, his face, head, neck and hands were covered with blood. His clothing appeared saturated with the blood, and it was with the greatest difficulty that he could walk, assisted by patrolmen on either side. Just before the patrolmen reached headquarters with the prisoner, he stopped and vomited a great quantity of blood and complained of intense pains in his head.

When he entered the city prison every step he made upon the floor was marked with blood, and to those who were present the man presented the appearance of one dying. When inside the building the patrolmen released their hold upon the prisoner, and to work was he that he fell upon the side of the building.

As he fell Patrolman Phillips said: "Here's a burglar shot all to pieces."

"Yes, and I am going to die. Can't you get me a doctor?" said the negro, as he gasped for breath.

Stationhouse Keeper Buchanan walked around the counter, and taking the prisoner, he carried him into the corridor, where he was searched. As soon as the negro's pockets were emptied he dropped upon the floor with a terrible groan. Mr. Buchanan at once sent a messenger for Dr. Van Goldenovon, and he returned to the prisoner to make him as comfortable as possible. An old blanket was placed under his head and a bucket of water held over him. The doctor found two bullet holes entered the prison. They did not know that the burglar had been captured until they reached headquarters, and were greatly elated at the arrest. They entered the prison, and approaching the wounded burglar Mr. Sindall said:

"Well, we have got you this time, eh?"

"Yes, you've got me bad too. I'm going to die," answered Ruleford.

"What did you go into my house for?"

"To see what I could get."

"Well, you found what you could get, and I guess you are satisfied?"

"Yes, I'm satisfied."

Dr. Van Goldenovon reached the prison just in time to interfere with a confession Ruleford was making and began examining the extent of the negro's injuries. Ruleford complained of great pain in his head and hips. His head, neck and face were too bloody to permit an examination until the blood could be removed. While the janitor was waiting for the doctor, the doctor found two bullet holes in the negro's left hip. The probe was inserted but no depth could be ascertained. While probing the hole the doctor placed one hand on the negro's right hip and the other on the left, feeling the ball under the skin on that side. He quickly cut the skin open and the bullet dropped out, having passed entirely through the hole from one hip to the other. The wound was a very peculiar one and Mr. Sindall must have taken a very peculiar course not to have killed the negro. The darky stood the operation with a great deal of nerve. After the blood had been removed from the prisoner's face and head the doctor found two ugly scalp wounds on the head. At first it was thought that these had been made by pistol bullets, but later it was ascertained that they had been made by the burglar's hands. A slight scratch was found on his shoulder where a bullet had just touched the skin. Of all the wounds only one amounts to anything. The one through the body is a very strange wound, and is considered extremely dangerous.

The burglary was one of the boldest ever worked in Atlanta, and the capture of the burglar a piece of good work.

Mr. Sindall lives on the corner of Walton and Spring streets. His residence is a one-story cottage, built in the 1840s.

The windows in the front of the parlor through which the burglar entered had small veranda surrounded by a railing in front of it. When Captain Moon first detailed Patrolmen Stearns and Abbott to watch the residence, they were told to keep a new unfinished building across Spring street.

On Saturday night went into the house, and when the burglar entered were located in the two rooms as marked in the diagram. About 10 o'clock the burglar entered the house, and saw the burglar pass under the street lamp. They recognized him as the same negro who had turned out the light on the previous night and went to the rear of the house. The darky halted near the light, and after looking all around walked up Spring street and then came back and walked up Walton. He approached the front gate and opened it cautiously. He went into the yard and went up to the veranda leading to the front door. Patrolman Stearns thought he was going to enter by the window on the side of the building right by him, but Ruleford picked up a door mat and walked across the front window laid it beside the small veranda. He then returned to the sidewalk and after looking about again went up to the street lamp and turned it out. At the same time he pulled out his shoes. Patrolman Stearns was looking at him, and as the darky straightened up the patrolmen went back to their corner. Presently he heard the slats of the blinds moved. The darky turned the handle so as to look into the room, and seeing everything in total darkness he turned them back again. Then he shoved his hand through and with a noiseless work began unscrewing the lock. While he was working the door opened and the burglar came in. He went along the street and the darky crouched down and remained quiet. In a short time he began working at the blind again and in a few moments he opened it. In all the work he was so noiseless that Patrolman Stearns did not know what he was doing, while Patrolman Abbott and Mr. Sindall, who was lying on the bed in the rear room, knew nothing of it.

After the blind opened the burglar entered cautiously, noiselessly and standing within three feet of Patrolman Stearns, closed the blind behind him. When the burglar was close the patrolman could not see two feet in front of him, so dark was the room. He felt satisfied that the burglar would try to reach the rear room through the open door, and kept his eye on the burglar as he came.

Light came through the door from a street lamp on Marietta street. In a few seconds the burglar's form was outlined in the doorway, and then Patrolman Stearns leveled his gun and fired.

The report was deafening.

It was the first intimation Ruleford had that he was detected. He attempted to spring forward, but the ball hit him squarely through the chest and he came to his knees. As he fell he placed his hand on the bed upon which Mr. Sindall was lying and within two inches of his gun.

When the report rang out, Mr. Sindall said:

"Did you get him?"

He was afraid to move, however, because of the entire shooting still. When the darky fell, Patrolman Abbott heard the noise and, guided by the sound, fired his first shot. The ball passed directly over Mr. Sindall, and as the report died away he asked again:

"Did you get him this time?"

The burglar was on his feet again and made a dive for a window. Patrolman Abbott was another bullet after him, but it missed. Then the blind spring open and through it came a light, guided by which Patrolman Abbott fired again, but just as he pulled the trigger the negro sprang through the window and went

up Spring street at a rapid rate. Just as he turned into Marietta, Patrolmen Phillips and Brennan, who had heard the firing, sighted him and gave chase. At Fairfax street, the negro turned upon Patrolmen Phillips and started him but was knocked down with the club.

During the shooting, Mrs. Sindall was sleeping in a room across the hallway. As the first report rang out, knowing full well what was upon her, she felt terrible, as she was shot after shot was fired. She did not know whether she would find some one or whether she would be the one who was shot. She was considerably disappointed when she ascertained that the burglar had escaped.

Soon after the arrest of Ruleford Captain Moon went to the darky's house to search it, but found nothing. Yesterday morning when Dr. Van Goldenovon visited Ruleford he was suffering greatly. One leg was paralyzed and the wound was very feverish. He felt certain that he was going to die, and confessed a dozen burglaries. He admitted stealing Alderman Gramling's watch, and told how he had entered the house. The match, he said, was stolen, and last night Captain Moon went to that place to recover it. Late in the evening the negro was removed to jail.

WHY THEY WAITED.

East Tennessee Engineers Tell Why Sad New Case of New From Families.

The following card was sent to THE CONSTITUTION for publication.

ATLANTA, Ga., September 24, 1886.—Editors Constitution: In your issue of the 16th and 17th, containing accounts of the accident in which Engineer Buckley and Fireman Farris were killed, and the remains of the Georgia railroad are placed in a wrong light, and we ask that you assist us to place the facts before your readers that they may judge for themselves.

The withholding from the families of these two men the sad news of their death was the result of a consultation between Mr. J. J. Kress, master engineer, and the committee on the part of the railroad, and the friends of the dead men, who, prompted by the purest motives of kindness and sympathy, decided to allow them a night of peaceful rest, so that they would be better able to attend the funeral on next day.
